

# Take a closer look.

Easily examine forensic images  
with CSIpix Comparator.

This software significantly reduces the time it takes to enhance, calibrate, compare, and analyze fingerprints and other forensic images. It's easy to learn and easy to use because it has been designed with input from forensic experts from around the world. It allows you to accurately prepare court charts faster than ever before.

## Image enhancement features:

- Scale images
- Adjust contrast levels
- Perspective correction
- Side-by-side rotational alignment
- Adjust colour sliders
- Crop, zoom, or pan across side-by-side images simultaneously
- Open images from NIST files
- Produce magnified views
- Ghost cursor for easier comparison
- Multiple crop
- Export and save all images from a NIST file
- Generate PDF Reports

## System Requirements:

- Windows 10 & 11

Save time preparing and analyzing forensic images with Comparator.

"We have been using the CSIpix Comparator for approximately 5 years. The Comparator was installed on 5 workstations and it is now our dedicated software to all fingerprint comparisons. It makes the latent print analysis and comparison a much easier task. You can enlarge, mark and enhance with ease. The ability to do side by side comparison without the use of a magnifying glass is a huge bonus." - Forensic Supervisor, IAI CLPE, EnCE Forensic Computer Investigator, California
